PHILADELPHIA ALMSHOUSE, August 25, 1866.
Messrs J. B. DOBBINS & Co.—Gentles:—We have tried to economize in our laundry work at this institution, have bought materials, and made our own soap; but being induced to try your ELECTRIC SOAP, have to report our work done better, with less labor, and a saving of thirty per cent. in the cost of soap.

We manufacture our own woolen blankets, and have never been able to cleanse the wool so efficiently and at so little cost, as when using your soap.

The most difficult washing in our hospital can be done better, and with less expense, with your soap, than any we have ever made or bought.

Respectfully,
J. W. MALONE,
Superintendent of Mechanics at Philadelphia Alms-house.

We have found nothing equal to it for extracting grease spots from carpets and woolen clothing.

ALL ARE WASHED
IN A SUPERIOR MANNER
WITH VERY LITTLE LABOR.
And in One-Fourth of the Time
USUALLY REQUIRED.

Woolens do not shrink when washed with this Soap, and Dresses can be washed without being ripped apart. Fast colors are made bright and clear, and it is invaluable for cleansing Paint, Oil Cloths, etc. There is

GREAT ECONOMY IN THE USE OF THIS SOAP.

As the Clothes are not worn out by the use of Washing Machines, and the time and labor saved is worth more than the entire cost of the Soap. The materials used in the manufacture of this Soap are all of the finest quality, unadulterated, and is made by a very superior process, having cleansing properties that will be found most astonishing; and at the same time it will be found pleasant to the hands, as it tends to make them soft and smooth. A single trial will satisfy any person that this Soap should be in every family.

It is used by cutting into small shavings, and dissolving in hot water; then soaking the Clothes five to ten minutes: then a little hand rubbing will make them as clean as hours of hard machine rubbing would do with ordinary Soap.

For cleaning Paint use a sponge or cloth saturated with the solution. It will leave the Paint bright and uninjured. The repeated use of it on painted wood tends to make it glossy.
